

Bilal Sanayu Majid

Creative Developer & Full Stack Web Developer

Surabaya, Indonesia | bilal.lalsm@gmail.com | localhost:3000
github.com/Lal1602

PROFILE

Informatics student and creative developer who builds immersive, performance-minded web experiences with Next.js, Three.js and GSAP, and ships full-stack products with Node.js and Laravel.

SKILLS

- Frontend** TypeScript, React, Next.js, GSAP, Three.js, Tailwind CSS
- Backend & DevOps** Node.js, Laravel, PHP, MySQL, PostgreSQL, Docker
- Mobile & Game** React Native, Flutter, Phaser.js, Canvas API, Figma

EDUCATION

- Politeknik Elektronika Negeri Surabaya (PENS)** Present
D3 Informatics Engineering
- SMKN 10 Surabaya** 2022 – 2025
Software Engineering (RPL)

TRAINING, CERTIFICATION & COMPETITION

- Informatics Engineering Student — EPIS / PENS Surabaya** 2024 – Present
Focusing on software architecture, algorithms, dynamic web applications, and immersive 3D/WebGL experiences.
- Juara Harapan 2 — Web Tech — LKS Competition Surabaya** 2024
Won 2nd Runner-up Merit Prize at city level in Web Technologies, building modular frontends under competitive time constraints.
- Certified Junior Programmer — BNSP Indonesia** 2024
National competency certificate validating expertise in programming, databases, and software design standards.
- Game & Android Graduate — Timedoor Academy** 2023 – 2024
Completed advanced training in JavaScript game development (Phaser 3) and mobile app development (Android Studio).

SELECTED PROJECTS

- NOIR Photography** noir-photography.netlify.app
High-end photography portfolio featuring horizontal scrolling and GSAP. (Tailwind CSS, GSAP, ScrollTrigger, Lenis)
- LUMIERA Visual Poetry** lumiera.netlify.app
Ultra-cinematic photography portfolio with multi-layered SVG parallax. (Tailwind CSS, GSAP, Lenis, SVG Parallax)
- Digital Craftsman** digital-craftsman-lal.netlify.app
Immersive creative portfolio with WebGL particles and cinematic reveals. (Three.js, GSAP, HTML5, CSS3)

Creative Programmer

creative-progs-lal.netlify.app

Cinematic portfolio with Three.js WebGL background and custom interactions. (Three.js, GSAP, Lenis, WebGL)

MindPoint

mindpoint-by-bilal.netlify.app

Mindpoint: rotate and drag the perspective to align fragments and solve puzzles. (Typescript, CSS, Game Design, HTML, Javascript, Puzzle Illusion)

Aether Dreamscape

aether-dreamscape.netlify.app

Rotate the world, align platforms, and guide the orb to light. (CSS, HTML5, Javascript, Game Design, Experimental, 3D)

Ghost Buster

ghostbuster-by-bilal.netlify.app

Avoid ghost attacks using arrows and survive longer. (Typescript, CSS, Phaser JS, Game Design)

Herbal Mart

A scalable e-commerce platform featuring dynamic cart management and real-time product filtering, built to optimize user engagement. (HTML5, CSS3, JavaScript, Netlify)
